A Journey To Vulnerable Leadership

“Are you interested in becoming the best leader you can be? Consider becoming more vulnerable.” That’s the message retired Major General Mike Milano proposes. Sharing real-life experiences, Milano examines how vulnerability is no longer a dirty word when it comes to leadership.

After 33 successful years in the US Army and seven years with Target Corporation, Milano is convinced that the answer to great leadership in the future lies in a single concept. The incredible power of vulnerability.
