Core Values

Respect

Due regard for others; a feeling of deep admiration for someone or something elicited by their abilities, qualities, or achievements. Respect must be given to those around us – to our people and our clients – and we require respect to be reciprocated.

Excellence

The quality of being outstanding or extremely good; distinction; greatness. Excellence is what separates us from our competition and allows us to enjoy great satisfaction in our work and our relationships.

Integrity

The quality of being honest and having strong moral principles; uprightness. We are committed to always do what is right, legally and ethically.

Facility Condition Assessments

Utilize BUILDER™ SMS (Sustainment Management System) Software to:

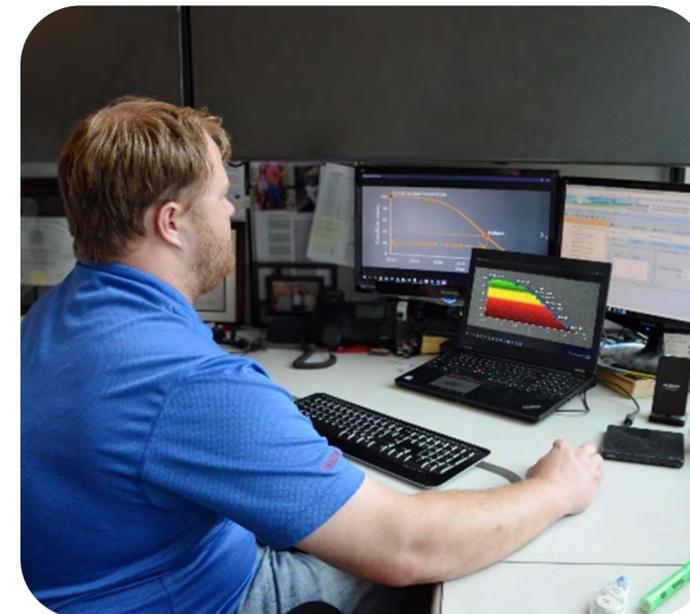

- Assess building condition and enter data into BUILDER™ software
- Determine building assets condition, functionality, remaining service life, and overall performance
- Provide cost-effective and efficient methods for maintaining facilities

Provides Assessment Report(s)

- Summarizes facility damage and assessment conditions
- Includes site maps and surveys of existing infrastructure and utilities
- Includes photos of site and damage
- Provides asbestos, lead, mold, and life safety reports for each building
- Furnishes cost estimates for needed repairs

Ask how Garver can help you take a more proactive approach to asset management!

Building Commissioning (Cx) Services

- Verifies all building systems work correctly and efficiently, and can be operated effectively to achieve the Owner's project requirements (*HVAC, controls, doors, plumbing, electrical*)
- Building results are a better use of space, better occupant comfort, and more energy efficient
- Provide commissioning documentation preparation, energy services, equipment monitoring and testing, building asset evaluation, sustainability reviews, systems operator training, and warranty phase activities
